Education

- 2021–present **Master of Engineering, Computer Science & Technology, Huazhong University of Science and Technology.**
Machine Learning, Graph Representation Learning, Large Language Models
- 2017–2021 **Bachelor of Engineering, Computer Science & Technology, Huazhong University of Science and Technology.**

Publications

Conference Proceedings

- 2023 **Xiran Song**, Jianxun Lian, Hong Huang, Zihan Luo, Wei Zhou, Xue Lin, Mingqi Wu, Chaozhuo Li, Xing Xie, and Hai Jin. xGCN: An extreme graph convolutional network for large-scale social link prediction. In *Proceedings of the ACM Web Conference 2023*, page 349–359, 2023.
- 2022 **Xiran Song**, Jianxun Lian, Hong Huang, Mingqi Wu, Hai Jin, and Xing Xie. Friend recommendations with self-rescaling graph neural networks. In *Proceedings of the 28th ACM SIGKDD Conference on Knowledge Discovery and Data Mining*, page 3909–3919, 2022.

Journal Articles

- 2023 Wei Zhou, Hong Huang, Ruize Shi, **Xiran Song**, Xue Lin, Xiao Wang, and Hai Jin. Temporal heterogeneous information network embedding via semantic evolution. *IEEE Transactions on Knowledge and Data Engineering*, pages 1–12, 2023.

Accepted Papers

- 2023 Zihan Luo, Hong Huang, Jianxun Lian, **Xiran Song**, Xing Xie, and Hai Jin. Cross-links matter for link prediction: Rethinking the debiased gnn from a data perspective. In *Proceedings of the 37th Conference on Neural Information Processing Systems*, 2023.

Open-source Project

- 2023 **XGCN: a light-weight Python library for large-scale graph neural network embedding.**
Developing XGCN: a light-weight library for large-scale graph neural network embedding, aiming at helping researchers to quickly embed million-scale graphs in a single-machine environment. GitHub: https://github.com/CGCL-codes/XGCN_library

Research Experience

Huazhong University of Science and Technology

- Sept. 2023 – present **Large Language Models for Graph Understanding.**
Evaluating and improving graph understanding abilities of large language models.
Advisor : **Dr. Hong Huang**, Associate Professor, School of Computer Science & Technology

Sept. 2021 – ***Large-scale Graph Neural Network Embedding.***

Sept. 2023 Developing graph neural network models and training strategies that have better performance on real-world large-scale graphs.

Advisor : **Dr. Hong Huang**, *Associate Professor, School of Computer Science & Technology*

[Microsoft Research Aisa](#)

Feb. 2021 – ***Graph Neural Networks for Friend Recommendation.***

June 2021 Applying graph neural networks to friend recommendation and developing models to improve the Xbox-Gaming's friend recommendation services.

Advisor : **Dr. Jianxun Lian**, *Senior Researcher, Social Computing Group*

Awards

2022 ***National Scholarship*** of Huazhong University of Science and Technology.

2022 ***Merit Student*** of Huazhong University of Science and Technology.
